```java
// Ozbirn, 09/03/14

public class Mailbox<T>
{
    private T value;

    public void setValue(T v)
    {
        value = v;
    }

    public T getValue()
    {
        return value;
    }

    public static void main(String args[])
    {
        Mailbox<Integer> mb = new Mailbox<>();

        mb.setValue(10);

        int myval = mb.getValue();

        System.out.println(myval);

        Mailbox<String> mb2 = new Mailbox<>();

        mb2.setValue("Hello");

        String myval2 = mb2.getValue();

        System.out.println(myval2);

    }
}
```
